

Dear Oversight Grid Colleagues,

The biennial Oversight Grid Symposium for 2020 was supposed to be held at NASA Langley Research Center this fall. However, due to Covid-19 and uncertainties of travel safety and the status of conference facilities, the usual in-person symposium has been postponed. While AIAA and other organizations have chosen to hold virtual conferences, the local organizing committee feels that the format of these events have been less than ideal, and that personal interaction has been a hallmark of the Oversight Symposia.

With that in mind, the current tentative plan is to postpone until Fall 2021. We will reevaluate the situation during the summer to see if this is feasible. New information will be posted to the Oversight Grid Symposium website, <http://oversetgridsymposium.org>.

Sincerely,

The Oversight Grid Symposium Steering Committee
